

Coefficients ξ_1^2 and C_1 for transient, 1D heat conduction: Infinite Cylinder, Centerline Temperature $T_0(t)$

$$T_0(t) = T_\infty + (T_i - T_\infty) C_1 \exp\left[-\xi_1^2 \frac{\alpha t}{r_0^2}\right]$$

Coefficients ξ_1^2 and C_1 for transient, 1D heat conduction: Infinite Cylinder, Centerline Temperature $T_0(t)$
